The City of Lakes

City Palace towers over the Pichola Lake. Maharana Uday Singh initiated in the construction of the palace but succeeding Maharanas added several palaces and structures to the complex retained a surprising uniformity to the design. The palace started building in year 1543-44.

This is a very congenial old building built right on the waterfront of Lake Pichola at Gangori Ghat. The palace has very interesting display of costumes and modern art. The glass and mirror in the interiors of the Haveli depicts delicate work and is well preserved too.

Built by Maharana Jagat Singh in 1651 the temple enshrines a black stone image of Lord Vishnu. There is a brass image of Garuda the Lord bird carries. It is the largest and most splendid temple of Udaipur.

Pichola Lake derives its name from Pichola Village was submerged and Maharana Uday Singh enlarged the lake after he founded the city. This picturesque lake encloses the Jag Niwas Island and the Jag Mandir. And, the City, Palace extends along its eastern banks.

High on a hilltop just outside Udaipur lies this dramatic 18th century palace, with a breathtaking view of the Mewar countryside Originally intended to be a towering five-story astronomical centre, it was later abandoned and used as a monsoon palace and hunting lodge. The now derelict palace dominates the skyline 2468 feet high on top of Bansdara Mountain.

An impressive bronze statue of Maharana Pratap and his favorite and loyal horse, stands at the top of Moti Magri (Pearl Mount) overlooking Fateh Sagar. There are the ruins of one of the first Udaipur's forts and there is also a charming Japanese rock garden not far away.
