Intellectual Property Rights (IPR) Cell

VISION: Intellectual property plays an important role in providing a competitive edge to any institution. The tangible assets like inventions, designs, software, brand names and other creative and innovative ideas are often much more valuable than physical assets. The IPR cell at GRIP is committed to encouraging, protecting, managing and commercializing intellectual properties such as patents, copyrights, trademarks *etc.* generated through the college. The cell creates a conducive environment in academics for the development of intellectual property.

MISSION: The elementary goal of the IPR cell is to make students and faculty members of GRIP familiar with IPR concepts.

The IPR cell will educate researchers and scholars on plagiarism and how protection against it avoids disputes over or denial of credit. Hence, IPR provisions will encourage further creative efforts. In the practical domain, the IPR cell will train current researchers and scholars to use patents and copyrights to tap into the economic potential of their scientific, technical or creative ideas. This will open avenues for startups and entrepreneurial understanding. Moreover, researchers and scholars can raise finances for their business ideas, enhance the market value of their business models, or use these ideas for profit-making. Further, the economic incentives will improve the quality and quantity of research.

Seven types of intellectual property rights will be covered:

- Patents
- Industrial Designs
- Trademarks
- Copyrights
- Geographical Indications
- Integrated Circuit Layouts
- Trade Secrets

GRIP/24/9062

Dated

24/01/24

The activities of IPR cell in Global Research Institute of Pharmacy are in alignment with the objectives of the Patent Information Centre, Panchkula of Haryana State Council for Science and Technology.

The major objectives and activities of the IPR cell include:

- Encourage creative and innovative research leading to new knowledge, ideas, and inventions.
- Assist faculty, staff, and students in assessing the patentability and commercial potential of their inventions.
- Provide training on provisional patent filing procedures in India and Abroad under the Patent Cooperation Treaty.
- Familiarize faculty, staff, and students with patent filing forms.
- Create mentorship programs for student innovators and reward innovation.
- Serve as a liaison between the institute and the Patent Information Center (PIC), HSCST, Haryana or NDRC, New Delhi.
- Organize National Workshops/Seminars/Conferences/ Expert/Guest lectures on Intellectual Property Rights.
- Participate in and arrange regular meetings with PIC, HSCST officers to identify patentable inventions.
- Encourage faculty members to carryout patent searches in-house and/or at PIC – Haryana and to fine-tune their search.
- Assist community members in obtaining IP protection for inventions and ideas.
- Forward eligible IP protection cases to PIC, HSCST, Haryana or NRDC, New Delhi.
